The CJNR is indebted to the persons below who served as reviewers for Volume 34. They gave generously of their time and shared their knowledge, and in so doing have contributed greatly to the editorial process and to the development of nursing knowledge.

Le CJNR est reconnaissante envers les personnes ci-dessous nommées pour avoir révisé son volume 34. Ces personnes ont généreusement donné de leur temps et ont partagé leur savoir. Ce faisant, elles ont largement contribué au processus éditorial et au développement des connaissances en sciences infirmières.

The CJNR Editorial Board has modified the Journal’s publication schedule so that each volume will fall within one calendar year. The Journal will continue to be published on a quarterly basis. Beginning in 2003, issue no. 1 will be published in March, followed by issues 2, 3, and 4 in June, September, and December. Due to this change, we are able to grant an extension on several expired deadlines for calls for papers.

**Nursing-Care Effectiveness**  
September 2003 (vol. 35, no. 3)

In the context of the changes that are currently taking place in healthcare systems, it is imperative that the effectiveness of nursing care be systemically studied and highlighted in research reports. Additionally, it is critical that the policy implications of such research be specifically addressed. For this issue of the Journal, we invite papers that examine nursing-care effectiveness in terms of health outcomes for individuals, families, groups, communities, or populations and from the perspective of the cost to clients and to health-care systems. We will consider manuscripts that describe research studies, present a systematic review, discuss the implications of nursing-care effectiveness research on policy, present methodological issues, or provide analysis of theoretical and/or ethical issues.

**Guest Editor: Dr. Sandra M. LeFort**  
**Submission Deadline:** *extended to January 15, 2003*
Gerontology
December 2003 (vol. 35, no. 4)

As populations age, all disciplines and public-service sectors are beginning to address the issues of ageing from their diverse perspectives. For this issue of CJNR, we invite manuscripts that present research focused on enhancing the health and life of older populations through the creation and dissemination of knowledge relevant to gerontological nursing practice and the policy, health-services delivery, and practice issues germane to optimizing the health and lives of older people. We particularly welcome papers on innovative interventions and strategies for promoting health and well-being in later life.

Guest Editor: Dr. Carol L. McWilliam
Submission Deadline: April 15, 2003

Health Promotion
December 2003 (vol. 36, no. 1)

The health promotion movement has had a profound influence on both nursing's perspectives of our clients and health and the development of practice approaches. In this issue, we invite papers that focus on the processes and outcomes of health promotion as well as innovative approaches to health promotion at the individual, family, community, or organizational level. Manuscripts that extend key theoretical and/or policy issues, synthesize and critique the literature, or present research findings are welcome, including those that consider health promotion within vulnerable populations such as persons living with chronic illnesses. We are particularly interested in papers that address innovative health promotion interventions, in any population.

Guest Editor: Dr. Marilyn Ford-Gilboe
Submission Deadline: July 15, 2003

CLINICIAN SCIENTIST – NURSING (Full-time)

As an experienced paediatric nurse and specialist in research design and methods, the Clinician Scientist – Nursing will be responsible for developing, implementing and evaluating a program of clinically-based research, and disseminating the findings. The Clinician Scientist – Nursing will support and promote research initiatives within nursing and the multidisciplinary research environment. You will work collaboratively with the Signy Hildur Eaton Chair in Paediatric Nursing Research, the Centre for Nursing, the Research Institute and the Child Health Services program at The Hospital for Sick Children, as well as with the Faculty of Nursing at the University of Toronto and other community affiliates.

As the successful candidate, you will have your Ph.D. in Nursing or a related discipline and completed a period of mentored research training (e.g. Career Scientist or postdoctoral fellow). You are eligible for licensing with the College of Nurses of Ontario. You have a proven record in obtaining external funding and completion of research studies, publications in peer reviewed journals and presentations at scientific meetings. You have experience in qualitative and/or quantitative research design and methods in one of the following preferred areas: pain, quality of life, coping and adaptation, effectiveness of interventions, outcomes or research utilization/dissemination. You are a problem solver, critical thinker, team and consensus builder, risk taker, role model and public speaker.

Please submit your résumé by January 31, 2003, quoting file #RA0208-LB, to: Leanne Baird, The Hospital for Sick Children, 555 University Avenue, Toronto, Ontario M5G 1X8. Fax: (416) 813-5671. E-mail: hr.recruiter@sickkids.ca

Only those applicants selected for an interview will be contacted.

The University of Toronto is strongly committed to diversity within its community. The University especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, and others who may contribute to further diversification of ideas. Canadian Citizens and permanent residents of Canada will be considered first.
The EUREKA! Fellowship in Nursing Research at the McGill University Health Centre represents a unique opportunity for nurses in clinical practice who are passionate about finding answers to clinical questions. The Award enables a nurse to function for one year as a Nursing Research Fellow at the MUHC.

The EUREKA! Fellowship is a gift of time. The Fellow has the time and support necessary to pursue a research project. The project can be in any clinical area of nursing.

During the one-year Award, the Fellow will work in the MUHC Nursing Research Department with the support of an experienced nurse researcher and/or researchers from another discipline.

**APPLICATION FORMS available from:**

School of Nursing

Leading the way…

A Unique Philosophy
• Internationally recognized for its unique approach to nursing and health promotion

A Unique University
• World-renowned McGill is one of Canada’s oldest universities, located in downtown Montreal

A Unique City
• Montreal is a diverse multicultural metropolis with European flair

PhD (offered jointly with the Université de Montréal)
• Designed to train researchers and prepare leaders in the profession and in the health-care system

Master of Science
• Open to nurses holding a baccalaureate degree and to baccalaureate graduates with no previous preparation in nursing (generic master’s)
• Prepares clinicians and researchers to play a crucial role in shaping health care

Bachelor of Science in Nursing
• Prepares nurses to deal effectively with complex health issues relating to the individual, the family, and the community

Bachelor of Nursing
• Open to registered nurses from a college or other diploma nursing program
• Offered on a full-time or part-time basis; prepares nurses for practice within an increasingly complex health-care system

Information for Authors

The CJNR is a quarterly journal. Its primary mandate is to publish nursing research that develops basic knowledge for the discipline and examines the application of the knowledge in practice. It also accepts research related to education and history and welcomes methodological, theory, and review papers that advance nursing science. Letters or commentaries about published articles are encouraged.

Procedure: 1. Articles must be written in English. 2. Authors are requested not to put their name in the body of the text, which will be submitted for blind review. 3. Only unpublished manuscripts are accepted. 4. All research studies must have received IRB approval. 5. A written statement assigning copyright of the manuscript to the CJNR must accompany all submissions to the Journal. 6. Manuscripts should be submitted by e-mail to the Editor, c/o joanna.toti@mcgill.ca

Manuscripts

Manuscripts must be prepared in accordance with the Fifth Edition of the Publication Manual of the American Psychological Association. Research articles must follow APA style for presentation of the literature review, research questions and hypotheses, method, and discussion. All articles must adhere to APA guidelines for references, tables, and figures. Footnotes are to be avoided.

Title page: This should include author(s) name, degrees, position, information on financial assistance, acknowledgements, address, and present affiliation. The title of the manuscript should not exceed 10 words. A suggested running head of five words or less should also be included.

Abstract: Research articles must include a summary of 100–150 words describing the purpose, design, sample, findings, and implications. Theory and review papers must include a statement of the principal issue(s), the framework for analysis, and summary of the argument. Below the abstract include four to six words that describe the substance of the article, using both specific and general terms. Please bear in mind that keywords are for indexing purposes and are a widely used means of searching. Consult MESH if you require assistance with selecting keywords.

Text: The text should not exceed 20 double-spaced typed pages, including references, tables, and figures.

References: The references are listed in alphabetical order, double-spaced, and placed immediately following the text. All author names must be included for each reference. Journal names must be spelled out in full.

Tables and figures: Tables and figures should appear only when absolutely necessary, up to a maximum of four. They must be self-explanatory and summarize relevant information without duplicating the content of the text. Each table must include a short title, omit abbreviations, and be typed on a separate page. Figures must be in camera-ready form. Tables and figures should be placed at the end of the paper, after the references.

Review process and publication information: The CJNR is a peer-reviewed journal. Manuscripts are submitted to two reviewers for blind review. The first author will be notified following the review process, which takes approximately 12 weeks to complete.

Electronic copy: Authors must provide satisfactory electronic files of the accepted final version of the manuscript.
Renseignements à l'intention des auteurs

La revue CJNR est publiée quatre fois par année. Son mandat premier est de diffuser les travaux de recherche axés sur le développement des connaissances et leur mise en pratique au sein de la discipline des sciences infirmières. La revue accepte également les articles de recherche traitant d'éducation et d'histoire, ainsi que les articles sur la méthodologie, la théorie et l'analyse critique qui contribuent à l'avancement des sciences infirmières. Les lecteurs et lectrices sont invités à faire parvenir leurs commentaires sur les articles publiés dans la revue.

Modalités : 1. Les articles doivent être rédigés en anglais. 2. Pour garantir l'anonymat des auteurs pendant l'examen des articles, on demande à ceux-ci d'éviter d'indiquer leurs noms dans le corps du texte. 3. Seuls les manuscrits inédits seront acceptés. 4. Tous les projets de recherche doivent avoir reçu l'approbation d'un comité d'éthique. 5. Une déclaration de cession du droit d'auteur à la revue CJNR doit accompagner toutes les propositions d'article. 6. Les manuscrits doivent être soumis par courriel à la rédactrice en chef a/s : joanna.toti@mcgill.ca.

Manuscrits

Page titre : La page titre du manuscrit doit donner le nom, l’adresse et l’affiliation des auteurs ou auteures, ainsi que leurs diplômes, l’aide financière reçue et les remerciements. Le titre ne doit pas dépasser 10 mots. Vous devez également suggérer un titre courant de cinq mots ou moins.

Résumé : Les articles de recherche doivent comprendre un résumé de 100 à 150 mots qui expose l’objectif, la méthode, l’échantillon, les résultats et les conclusions de l’étude. Les articles théoriques et les analyses critiques doivent présenter les principaux objectifs recherchés, le cadre d’analyse et un résumé de la discussion. Sous le résumé, décrivez en quatre à six mots la substance de l’article, en employant des termes généraux et spécifiques. Veuillez garder à l’esprit que les mots clés servent à l’indexage et sont largement utilisés pour faire des recherches. Consultez MESH pour choisir vos mots clés si nécessaire.

Texte : Le manuscrit ne doit pas dépasser 20 pages dactylographiées à double interligne, en tenant compte des tableaux, des figures et des références.

Tableaux et figures : On ne doit avoir recours aux tableaux et aux figures que dans les cas où cela est absolument nécessaire, jusqu’à un maximum de quatre. Ceux-ci doivent être suffisamment explicites et résumer les données pertinentes en évitant les redites. Chaque tableau doit porter un titre, être exempt de toute abréviation et dactylographié sur une page séparée. Les figures doivent être prêtes à photographe. Les tableaux et les figures doivent être placés à la fin de l’article, à la suite des références.

Examen des manuscrits et renseignements relatifs à la publication : La revue CJNR est fondée sur l’évaluation par les pairs. Deux réviseurs examineront le manuscrit à partir d’une copie anonyme. On avisera le premier auteur de leur décision au terme du processus, lequel nécessite douze semaines environ.

Copie électronique : Si le manuscrit est accepté, les auteurs doivent remettre une copie électronique acceptable de la version finale du texte.
CJNR

The CJNR provides a forum for the publication of research and scholarly articles relevant to nursing and health. You and your agency are invited to subscribe to this journal.

You also are invited to submit articles to the Journal. The CJNR publishes articles on clinical research, methodological issues, education research, and historical research, as well as theory and position papers that advance nursing knowledge. Information for authors and the criteria for evaluating articles can be obtained from the Managing Editor.

CJNR

La revue CJNR constitue une tribune pour la publication d'articles savants et de recherche concernant les sciences infirmières et la santé. Nous vous invitons, vous et votre organisme, à vous abonner à la revue.

Nous vous invitons également à présenter des articles à la revue. CJNR publie des articles traitant de recherche clinique, de questions méthodologiques, de recherche en éducation, de recherche historique ainsi que des articles théoriques et des prises de position susceptibles de faire avancer les connaissances dans le domaine des sciences infirmières. On peut également obtenir de l'Administratrice de la revue les renseignements à l'intention des auteurs ainsi que les critères d'acceptation des articles.
