Call for Reviewers / Examinatrices recherchées

The purpose of peer review in the publication of nursing research is to ensure the advancement of nursing knowledge through critical analysis of submitted manuscripts. Through such analysis, constructive criticism is provided to the authors and publication recommendations are made to the editors. The quality of the manuscripts published in the *Canadian Journal of Nursing Research* is due, in large part, to the input of its reviewers.

Excellent reviewers possess the following attributes: high standards; the ability to identify key issues and defend a position taken on them, to see how a manuscript might add to the existing body of knowledge, and to communicate effectively with authors; a high degree of objectivity; and a willingness to learn from authors. The *CJNR* is seeking researchers who possess these attributes and who are interested in contributing to the advancement of nursing knowledge in this way.

If you are interested in being considered as a regular reviewer for the *CJNR*, please contact our office for more information. A reviewer's initiation package is issued to each new reviewer.

Continuity & Transitional Care
Submission deadline: July 15, 2003
Publication date: March 2004

Economics of Nursing Care

June 2001 (vol. 33, no. 1)

Research on the economics of nursing care focuses on the cost implications of nursing services. These may take the form of cost-minimization, cost-benefit, cost-utility, or cost-effectiveness analyses. Economic evaluation in nursing is still relatively new. Papers are sought that examine the economic aspects of nursing care, which may include the use of system resources such as length of stay or emergency visits. Priority will be given to papers that examine the effects and expense of nursing care from multiple points of view.

Guest Editor: Dr. Gina Browne
Submission Deadline: October 15, 2000

Home Care

September 2001 (vol. 33, no. 2)

The home has become the predominate site for the delivery of health care and supportive services in Canada. Many health-care institutions have closed and those that remain have been reduced in both size and range of functions. This shift in the site of care delivery is a result of the combined effects of medical, pharmaceutical, and technological advances, together with a political climate of fiscal restraint. This issue of the *CJNR* will focus on the implications of this major change for nursing practice, research, education, ethics, and politics. Theoretical, philosophical, and research-based manuscripts on the provision or receipt of nursing and other supportive services in the home are solicited.

Guest Editor: Dr. Patricia McKeever
Submission Deadline: January 15, 2001

Please send manuscripts to:
The Editor, *Canadian Journal of Nursing Research*
McGill University School of Nursing
3506 University Street, Montreal, QC H3A 2A7 Canada

Co-sponsored by the American Association for the History of Nursing and the University of Virginia School of Nursing

Baycrest Centre for Geriatric Care
Ben & Hilda Katz Endowed Chair in Geriatric Nursing

QUALIFICATIONS

Applications from internationally renowned nurse scholars with a record of research excellence in geriatric nursing are sought for this position. Requirements are: a doctorate in nursing or a related field, a record of interdisciplinary research, demonstrated excellence in teaching and mentoring, and qualifications for the rank of Professor.

THE PROFESSORSHIP

The individual selected for the Ben & Hilda Katz Chair in Geriatric Nursing, which is situated within the Kunin-Lunenfeld Applied Research Unit (KLARU), must be committed to an active program of interdisciplinary research, and to collaborating with colleagues at the Baycrest Centre and the University of Toronto. The professorship is for a period of five years (renewable). A competitive salary and research stipend are offered.

UNIVERSITY OF TORONTO FACULTY OF NURSING

The University of Toronto Faculty of Nursing is committed to the advancement of health care by deepening and widening the theoretical and scientific bases for nursing excellence. Scholarly and scientific work undertaken by faculty members must be innovative and relevant, and must reflect international and interdisciplinary perspectives with regard to knowledge and practice development.

APPLICATIONS

Letters of application/nomination will be accepted until the position is filled. These, along with a curriculum vitae and a list of references, should be sent to: Dr. David L. Streiner, Baycrest Centre for Geriatric Care, Kunin-Lunenfeld Applied Research Unit, 3560 Bathurst Street, Toronto, Ontario M6A 2E1 Canada. Telephone: 416-785-2500 x2534. Fax: 416-785-4230.

University of Toronto - Dean, Faculty of Nursing

The University of Toronto is seeking an exceptional academic with the vision, presence and drive to lead its Faculty of Nursing through a period of unprecedented expansion and development.

Nursing is one of six health-related Faculties collaborating through the Council of Health Sciences and Social Work Deans of the University of Toronto. The Faculty of Nursing is an integral part of one of North America's largest academic health science complexes, which incorporates eight major teaching hospitals, as well as a network of community hospitals. The Faculty is well-positioned to provide strong academic leadership and research in support of nursing practice and health care.

The Faculty of Nursing is renowned internationally for the quality of its research in such areas as Nursing Administration, Home Care, Clinical Pain Management, Maternal and Infant Health, Mental Health and Dementia Care Giving. The faculty is committed to the preparation of leaders for nursing research and nursing education as well as for the profession. A well-established and growing PhD program is central to this mandate.

The Faculty's reputation for excellence in graduate education is also reflected in programs leading to the MN and joint MN/MBA degrees. Graduates of the Master's program are prepared to be advanced practitioners with specialization in such areas as clinical nursing, nursing administration, and acute care nurse practitioners, with either an adult or child focus.

A small, innovative two-year second-entry program leading to a BScN is offered to students who have completed at least two years of university study.

Acknowledged as a key academic leader within the University itself, the Dean will excel at representing the University to the community and will build on successful relationships with the teaching hospitals and other key stakeholders within the health professions and health care sector. The successful candidate will possess distinguished credentials as a researcher and educator, demonstrated strategic leadership skills, and a strong interest in academic administration. In addition, candidates should have proven skills in communication and consensus-building with faculty, staff, students and alumni, and professional, community and government bodies.

The Faculty of Nursing is among Canada's leaders in academic nursing. Many of its members are renowned scholars, internationally respected in their fields. The Dean will lead the Faculty in becoming the top nursing school in Canada and one of the leading programs in North America.

The appointment will be at an appropriate academic rank and at a salary level commensurate with experience. The preferred starting date is July 1, 2001. The University of Toronto is strongly committed to diversity within its community. The University especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities and others who may contribute to further diversification of ideas. In order to discuss this challenging position further, please reply in strict confidence, to:

Janet Wright & Associates Inc.

McGill University
School of Nursing

Leading the way...

A Unique Philosophy

- Internationally recognized for its unique approach to nursing and health promotion

A Unique University

- World-renowned McGill is one of Canada's oldest universities, located in downtown Montreal

A Unique City

- Montreal is a diverse multicultural metropolis with European flair

---

PhD (offered jointly with the Université de Montréal)

- Designed to train researchers and prepare leaders in the profession and in the health-care system

Master of Science

- Open to nurses holding a baccalaureate degree and to baccalaureate graduates with no previous preparation in nursing (generic master's)
- Prepares clinicians and researchers to play a crucial role in shaping health care

Bachelor of Science in Nursing

- Prepares nurses to deal effectively with complex health issues relating to the individual, the family, and the community

Bachelor of Nursing

- Open to registered nurses from a college or other diploma nursing program
- Offered on a full-time or part-time basis; prepares nurses for practice within an increasingly complex health-care system

Information for Authors

The *Canadian Journal of Nursing Research* is a quarterly journal. Its primary mandate is to publish nursing research that develops basic knowledge for the discipline and examines the application of the knowledge in practice. It also accepts research related to education and history and welcomes methodological, theory, and review papers that advance nursing science. Letters or commentaries about published articles are encouraged.

Procedure: Three double-spaced typewritten copies of the manuscript on 8 ½" x 11" paper are required. Authors are requested not to put their name in the body of the text, which will be submitted for blind review. Only unpublished manuscripts are accepted. A written statement assigning copyright of the manuscript to the *Canadian Journal of Nursing Research* must accompany all submissions to the Journal. Manuscripts are sent to: The Editor, *Canadian Journal of Nursing Research*, School of Nursing, McGill University, 3506 University Street, Montreal, QC H3A 2A7. E-mail: jtoti@po-box.mcgill.ca

Manuscripts

All manuscripts must follow the fourth edition of the *Publication Manual of the American Psychological Association*. Research articles must follow the APA format for presentation of the literature review, research questions and hypotheses, method, and discussion. All articles must adhere to APA guidelines for references, tables, and figures. Footnotes should not be used.

Title page: This should include author name(s), degrees, positions and affiliations, information on financial assistance, acknowledgements, and contact information.

Abstract: Research articles must include a summary of 100–150 words on the purpose, design, sample, findings, and implications of the research. Theory and review papers must include a statement of the principal issue(s), the framework for analysis, and a summary of the argument.

Text: The text should not exceed 20 double-spaced typed pages including references, tables, and figures (which are placed at the end of the text). Articles must be written in English.

References: The references are listed in alphabetical order, double-spaced, and placed immediately following the text. Author names and journal citations must be spelled out in full.

Tables and figures: Tables and figures should appear only when absolutely necessary. They must be self-explanatory and summarize relevant information without duplicating the content of the text. Each table must include a short title, omit abbreviations, and be typed on a separate page. Figures must be in camera-ready form.

Review process and publication information: The *Canadian Journal of Nursing Research* is a peer-reviewed journal. Manuscripts are submitted to two reviewers for blind review. The first author will be notified following the review process, which takes approximately 12 weeks to complete.

Electronic copy: Authors must provide satisfactory electronic files of the accepted final version of the manuscript.

Renseignements à l'intention des auteurs

La *Revue canadienne de recherche en sciences infirmières* est publiée quatre fois par année. Son mandat est de diffuser la recherche en sciences infirmières qui a trait au développement des connaissances dans la discipline et à l'analyse de la mise en pratique de ces connaissances. La revue accepte également des articles de recherche liés à l'éducation, à l'histoire de même que des articles liés à la méthodologie, la théorie et l'analyse critique qui favorisent le développement des sciences infirmières. Nous vous invitons à nous faire parvenir également vos commentaires sur les articles publiés.

Modalités : Les textes doivent être soumis en trois exemplaires, être dactylographiés à double interligne sur des feuilles 216 mm x 279 mm et être adressés à la rédactrice en chef, à la *Revue canadienne de recherche en sciences infirmières*, Université McGill, École des sciences infirmières, 3506, rue University, Montréal, QC H3A 2A7. Courriel: jtoti@po-box.mcgill.ca Il est entendu que les articles soumis n'ont pas été simultanément présentés à d'autres revues. Veuillez également inclure, avec la soumission, une déclaration de propriété et de cession de droits d'auteurs. Finalement, afin de garder l'anonymat lors du processus de révision, veuillez ne pas inclure les noms des auteurs dans le texte.

Manuscrits

La présentation du manuscrit doit respecter les normes du *Publication Manual of the American Psychological Association*, 4e édition, 1994. Notamment, les figures, tableaux, illustrations et références doivent être présentés selon les normes prescrites. Il est suggéré de ne pas avoir recours aux notes de bas de page.

Page titre : Pour assurer la lecture anonyme des textes soumis, seule la page titre du manuscrit comprendra le nom, l'adresse et l'affiliation de(s) auteur(s), les diplômes obtenus ainsi que l'aide financière reçue et les remerciements.

Résumé : Un résumé d'environ 100 à 150 mots chacun doit précéder le texte. Ce résumé devrait comprendre l'objectif, la méthode, les résultats et les retombées de la recherche. Les manuscrits qui concernent la théorie et les analyses critiques doivent inclure une identification des objectifs principaux, le cadre conceptuel utilisé pour l'analyse des données et un résumé de la discussion.

Texte : La longueur totale d'un manuscrit, incluant les tableaux, les figures et les références, ne doit pas dépasser 20 pages, dactylographiées à double interligne. Les articles doivent être rédigés en anglais.

Références : Les références doivent paraître en ordre alphabétique, à double interligne et faire suite au texte. Les noms des auteurs de même que les citations de revues doivent être écrits au long.

Tableaux et schémas : Les tableaux et schémas doivent paraître seulement si nécessaire. Ils doivent résumer des données pertinentes sans redire le contenu du texte. Chaque tableau doit comprendre un titre, ne pas comprendre d'abréviations et être dactylographié sur une page à part. Vous devez remettre les originaux des schémas dessinés à l'encre de Chine et prêts à être photographiés.

Examen des manuscrits et renseignements relatifs à la publication : Lorsqu'un manuscrit est soumis pour des fins de publication à la *Revue canadienne de recherche en sciences infirmières*, le comité de rédaction entame le processus de lecture : il envoie à un minimum de deux réviseurs, spécialistes du sujet dont traite le texte, un exemplaire anonyme du manuscrit ainsi que la grille d'évaluation des manuscrits. Sur réception des évaluations des réviseurs, le comité de rédaction décide si le texte peut être publié et en informe l'auteur responsable en lui faisant part des évaluations des réviseurs. Ce processus nécessite habituellement douze semaines. Si la décision est favorable, le comité peut proposer des corrections que l'(les) auteur(s) devra(ont) effectuer avant que le texte ne soit publié.

Copie électronique : Les auteurs doivent remettre un exemplaire de leur article sur disquette, suite à l'acceptation finale de l'article.

Canadian Journal of Nursing Research
Revue canadienne de recherche en sciences infirmières

The *Canadian Journal of Nursing Research* provides a forum in Canada for the publication of research and scholarly articles relevant to nursing and health. You and your agency are invited to subscribe to this journal.

You also are invited to submit articles to the *Canadian Journal of Nursing Research*. *CJNR* publishes articles on clinical research, methodological issues, education research, and historical research, as well as theory and position papers that advance nursing knowledge. Information for authors and the criteria for evaluating articles can be obtained from the Managing Editor.
