

Reviewers/Révisseurs

Volume 33: 2001–2002

The Canadian Journal of Nursing Research is indebted to the persons below who served as reviewers for Volume 33. They gave generously of their time and shared their knowledge, and in so doing have contributed greatly to the editorial process and to the development of nursing knowledge.

La Revue canadienne de recherche en sciences infirmières est reconnaissante envers les personnes ci-dessous nommées pour avoir révisé son volume 33. Ces personnes ont généreusement donné de leur temps et ont partagé leur savoir. Ce faisant, elles ont largement contribué au processus éditorial et au développement des connaissances en sciences infirmières.

Addiction & Dependence

December 2002 (vol. 34, no. 3)

In nursing and in other disciplines, addiction, dependence, and addictive behaviours and their health consequences are of growing social concern. This issue will focus on all aspects of these phenomena as they intersect with nursing practice in all health-care settings. We are interested in addiction in all its forms (e.g., tobacco, drugs, alcohol), any behaviour that results in a physiological dependency (e.g., eating disorders), the effects on individual and family well-being across the lifespan, physical and mental health outcomes, and prevention and intervention. We are also interested in individual, parental/family, and social/environmental factors that place individuals at risk or that lessen the risk of these phenomena. We are particularly interested in the testing of interventions and the factors that contribute to an intervention's success. We plan to mainly publish research reports but will consider papers on theory development and testing. We welcome investigations that use either qualitative or quantitative data or a combination of the two.

Guest Editor: Dr. Pamela Ratner

Submission Deadline: April 15, 2002

Culture & Gender

March 2003 (vol. 34, no. 4)

Culture and gender have been identified as important determinants of health. For this issue, we invite papers that examine the interaction of culture and gender with other health determinants, and the influence of culture and gender on the outcomes of nursing interventions. Manuscripts that describe research studies, present a systematic review, or provide a theoretical analysis will be considered. We are particularly interested in papers that focus on innovative interventions designed to mediate the influence of culture or gender on collective health action, individual behaviour change, social environments, health-service utilization, or health status. We welcome papers describing studies undertaken either in Canada or internationally.

Guest Co-editors: Dr. Nancy Edwards and Dr. Judy Mill

Submission Deadline: July 15, 2002

Please send manuscripts to:

Call for Reviewers / Examinatrices recherchées

The purpose of peer review in the publication of nursing research is to ensure the advancement of nursing knowledge through critical analysis of submitted manuscripts. Through such analysis, constructive criticism is provided to the authors and publication recommendations are made to the editors. The quality of the manuscripts published in the *Canadian Journal of Nursing Research* is due, in large part, to the input of its reviewers.

Excellent reviewers possess the following attributes: high standards; the ability to identify key issues and defend a position taken on them, to see how a manuscript might add to the existing body of knowledge, and to communicate effectively with authors; a high degree of objectivity; and a willingness to learn from authors. The *CJNR* is seeking researchers who possess these attributes and who are interested in contributing to the advancement of nursing knowledge in this way.

If you are interested in being considered as a regular reviewer for the *CJNR*, please contact our office for more information. A reviewer's initiation package is issued to each new reviewer.

La bourse EURÉKA! de recherche
en Sciences infirmières

The EUREKA! Fellowship
in Nursing Research

The EUREKA! Fellowship in Nursing Research at the McGill University Health Centre presents a unique opportunity for nurses in clinical practice who are passionate about finding answers to clinical questions. The Award enables a nurse to function for one year as a Nursing Research Fellow at the MUHC.

The EUREKA! Fellowship is a gift of time. The Fellow has time and support to pursue a research project. The project can be in any clinical area of nursing.

During the one-year Award, the Fellow will work in the MUHC Nursing Research Department with the support of an experienced nurse researcher and/or researchers from another discipline.

APPLICATION FORMS available from:

Department of Nursing Research
McGill University Health Centre
Montreal General Hospital Site
1650 Cedar Avenue
Room D6-156
Montreal, QC H3G 1A4
(514) 934-1934, local 4188

APPLICATION DEADLINE: May 15, 2002

McGill University

School of Nursing

Leading the way...

A Unique Philosophy

- Internationally recognized for its unique approach to nursing and health promotion

A Unique University

- World-renowned McGill is one of Canada's oldest universities, located in downtown Montreal

A Unique City

- Montreal is a diverse multicultural metropolis with European flair
-

PhD (offered jointly with the Université de Montréal)

- Designed to train researchers and prepare leaders in the profession and in the health-care system

Master of Science

- Open to nurses holding a baccalaureate degree and to baccalaureate graduates with no previous preparation in nursing (generic master's)
- Prepares clinicians and researchers to play a crucial role in shaping health care

Bachelor of Science in Nursing

- Prepares nurses to deal effectively with complex health issues relating to the individual, the family, and the community

Postgraduate Diploma of Nursing

Prepares registered nurses from a college

into a university nursing program

on a full- or part-time basis;

for more information, contact the School of Nursing, 3841 University Street, Montreal, PQ H3T 1M2, Canada

THE MCGILL MODEL OF NURSING

A book on a timely nursing model.
A perspective to guide nursing practice, education, administration,
and research in today's health-care system.

410 pp, \$40 (\$30 US)

To order, please contact:

Joanna Toti

McGill University School of Nursing
3506 University Street, Montreal, Quebec H3A 2A7

Tel: 514-398-6172 Fax: 514-398-8455

E-mail: joanna.toti@mcgill.ca

Information for Authors

The *Canadian Journal of Nursing Research* is a quarterly journal. Its primary mandate is to publish nursing research that develops basic knowledge for the discipline and examines the application of the knowledge in practice. It also accepts research related to education and history and welcomes methodological, theory, and review papers that advance nursing science. Letters or commentaries about published articles are encouraged.

Procedure: Three double-spaced typewritten copies of the manuscript on 8½" x 11" paper are required as well as an electronic copy to joanna.toti@mcgill.ca. Authors are requested not to put their name in the body of the text, which will be submitted for blind review. Only unpublished manuscripts are accepted. A written statement assigning copyright of the manuscript to the *Canadian Journal of Nursing Research* must accompany all submissions to the Journal. Manuscripts are sent to: The Editor, *Canadian Journal of Nursing Research*, School of Nursing, McGill University, 3506 University Street, Montreal QC H3A 2A7. E-mail: <jtoti@po-box.mcgill.ca>.

Manuscripts

All manuscripts must follow the 5th edition of the *Publication Manual of the American Psychological Association*. Research articles must follow the APA format for presentation of the literature review, research questions and hypotheses, method, and discussion. All articles must adhere to APA guidelines for references, tables, and figures. Footnotes should not be used.

Title page: This should include author name(s), degrees, positions and affiliations, information on financial assistance, acknowledgements, and contact information.

Abstract: Research articles must include a summary of 100–150 words on the purpose, design, sample, findings, and implications of the research. Theory and review papers must include a statement of the principal issue(s), the framework for analysis, and a summary of the argument.

Text: The text should not exceed 20 double-spaced typed pages including references, tables, and figures (which are placed at the end of the text). Articles must be written in English.

References: The references are listed in alphabetical order, double-spaced, and placed immediately following the text. Author names and journal citations must be spelled out in full.

Tables and figures: Tables and figures should appear only when absolutely necessary. They must be self-explanatory and summarize relevant information without duplicating the content of the text. Each table must include a short title, omit abbreviations, and be typed on a separate page. Figures must be in camera-ready form.

Review process and publication information: The *Canadian Journal of Nursing Research* is a peer-reviewed journal. Manuscripts are submitted to two reviewers for blind review. The first author will be notified following the review process, which takes approximately 12 weeks to complete.

Electronic copy: Authors must provide satisfactory electronic files of the accepted final version of the manuscript.

Renseignements à l'intention des auteurs

La *Revue canadienne de recherche en sciences infirmières* est publiée quatre fois par année. Son mandat est de diffuser la recherche en sciences infirmières qui a trait au développement des connaissances dans la discipline et à l'analyse de la mise en pratique de ces connaissances. La revue accepte également des articles de recherche liés à l'éducation, à l'histoire de même que des articles liés à la méthodologie, la théorie et l'analyse critique qui favorisent le développement des sciences infirmières. Nous vous invitons à nous faire parvenir également vos commentaires sur les articles publiés.

Modalités : Les textes doivent être soumis en trois exemplaires, être dactylographiés à double interligne sur des feuilles 216 mm x 279 mm et être adressés à la rédactrice en chef, à la *Revue canadienne de recherche en sciences infirmières*, Université McGill, École des sciences infirmières, 3506, rue University, Montréal QC H3A 2A7. De plus, vous devez soumettre une copie électronique de votre manuscrit à joanna.toti@mcgill.ca. Il est entendu que les articles soumis n'ont pas été simultanément présentés à d'autres revues. Veuillez également inclure, avec la soumission, une déclaration de propriété et de cession de droits d'auteurs. Finalement, afin de garder l'anonymat lors du processus de révision, veuillez ne pas inclure les noms des auteurs dans le texte.

Manuscrits

La présentation du manuscrit doit respecter les normes du *Publication Manual of the American Psychological Association*, 5^e édition. Notamment, les figures, tableaux, illustrations et références doivent être présentés selon les normes prescrites. Il est suggéré de ne pas avoir recours aux notes de bas de page.

Page titre : Pour assurer la lecture anonyme des textes soumis, seule la page titre du manuscrit comprendra le nom, l'adresse et l'affiliation de(s) auteur(s), les diplômes obtenus ainsi que l'aide financière reçue et les remerciements.

Résumé : Un résumé d'environ 100 à 150 mots chacun doit précéder le texte. Ce résumé devrait comprendre l'objectif, la méthode, les résultats et les retombées de la recherche. Les manuscrits qui concernent la théorie et les analyses critiques doivent inclure une identification des objectifs principaux, le cadre conceptuel utilisé pour l'analyse des données et un résumé de la discussion.

Texte : La longueur totale d'un manuscrit, incluant les tableaux, les figures et les références, ne doit pas dépasser 20 pages, dactylographiées à double interligne. Les articles doivent être rédigés en anglais.

Références : Les références doivent paraître en ordre alphabétique, à double interligne et faire suite au texte. Les noms des auteurs de même que les citations de revues doivent être écrits au long.

Tableaux et schémas : Les tableaux et schémas doivent paraître seulement si nécessaire. Ils doivent résumer des données pertinentes sans redire le contenu du texte. Chaque tableau doit comprendre un titre, ne pas comprendre d'abréviations et être dactylographié sur une page à part. Vous devez remettre les originaux des schémas dessinés à l'encre de Chine et prêts à être photographiés.

Examen des manuscrits et renseignements relatifs à la publication : Lorsqu'un manuscrit est soumis pour des fins de publication à la *Revue canadienne de recherche en sciences infirmières*, le comité de rédaction entame le processus de lecture : il envoie à un minimum de deux réviseurs, spécialistes du sujet dont traite le texte, un exemplaire anonyme du manuscrit ainsi que la grille d'évaluation des manuscrits. Sur réception des évaluations des réviseurs, le comité de rédaction décide si le texte peut être publié et en informe l'auteur responsable en lui faisant part des évaluations des réviseurs. Ce processus nécessite habituellement douze semaines. Si la décision est favorable, le comité peut proposer des corrections que l'(les) auteur(s) devra(ont) effectuer avant que le texte ne soit publié.

Copie électronique : Les auteurs doivent remettre un exemplaire de leur article sur disquette, suite à l'acceptation finale de l'article.

Canadian Journal of Nursing Research
Revue canadienne de recherche en sciences infirmières

The *Canadian Journal of Nursing Research* provides a forum in Canada for the publication of research and scholarly articles relevant to nursing and health. You and your agency are invited to subscribe to this journal.

You also are invited to submit articles to the *Canadian Journal of Nursing Research*. *CJNR* publishes articles on clinical research, methodological issues, education research, and historical research, as well as theory and position papers that advance nursing knowledge. Information for authors and the criteria for evaluating articles can be obtained from the Managing Editor.
